

AMERICAN WHISKEY

When launching our first aged spirit, we wanted something that was approachable and that reflected the place where it was made. To ensure the Wyoming weather can have full control over the aging conditions of our product, we opt to not climate control our barrel room. And while we do love fine bourbon, there is a time and a place for more mild and delicate expressions of whiskey profiles. Our American Whiskey showcases that.

We used techniques from the bourbon and Canadian whiskey worlds to develop a profile that was robust enough to be interesting, but mild enough to be enjoyed by all whiskey drinkers.

DESCRIPTION

- 40% ABV
- Softer, sweeter, and smoother than a bourbon
- We combine barrels of 4+ year old bourbon with barrels of wheat whiskey to marry together the best that both styles of whiskeys have to offer
- Both whiskeys are made from scratch and aged to maturity on site in full sized, 53-gallon barrels
- The barrels are made classically, with air seasoned staves, and are toasted and then charred
- After the two whiskeys are mixed together, the batch is finished with toasted oak to further enhance the flavor profile

TASTING NOTES

NOSE: Brown sugar, black cherry, cinnamon, cedar

TASTE: Prominent graham cracker up front, Bing cherry, milk chocolate, peanut brittle, long, sweet caramel finish with a hint of smoke.

HOW TO DRINK IT

- On the rocks or in a whiskey cocktail that calls for something mild and easygoing
- Pairs great with orange, vanilla, or cherry
- Try it in a Manhattan

KEY SELLING POINTS

- Flavor profile in between a bourbon and a Canadian whiskey softer, sweeter, smoother
- Made from scratch, aged traditionally on site
